

Personal Safety at Night

- 1** Walk with another person or a group if possible!
- 2** If you must walk alone, stay in well lit and heavily trafficked areas.
- 3** Don't be distracted with headphones. Be aware of your surroundings.
- 4** Know when the metro closes. Trains run less frequently later in the evening. Know when metro buses and the AU shuttle stop running
- 5** Download the **RAVE Guardian** campus safety app--it works off-campus too.

6 Be careful when crossing the street. Make sure cars can see you.

7 Avoid using ATM at night. If you must use an ATM, use one in a safe, well-lit area.

8 Have your keys out and ready before you get to your door.

9 If your light is on at night, people can see into your home unless you draw your curtains or blinds!
