## A. Administration

### ASSOCIATE DEAN OF GRADUATE STUDIES, AUGUST 2021 - PRESENT

---

- ❑ Oversee the graduate programs in the College of Arts & Sciences: 5 doctoral programs, 27 masters programs, and 19 graduate certificate programs. Total enrollment of about 800 graduate students.
- ❑ Supervise the graduate enrollment and marketing (GEM) team, which handles admissions, recruitment, and marketing, and supervise the graduate advising staff, which handles matters of registration, counseling, course planning, merit awards, fellowships, probation, and graduation clearances. Supervise the data analytics team which analyzes enrollment, retention, and placement data. Provide oversight of the recruitment budget of the GEM team. Coordinate on the marketing budget with the Assistant Dean of Communication and Outreach.
- ❑ Manage/seek external partnerships. Examples: *U.S. State Department Foreign Affairs IT Fellowship*, *White House Historical Association*, *Washington Post*, *Centre des études supérieures industrielles (CSIE)*, *Jindal Global University*, and *Chinese University of Hong Kong*.
- ❑ Meet with the College Dean, Department Chairs, and the other College Associate Deans (ADs) as a group regularly. Meet regularly with the Dean of Graduate and Professional Studies, Associate Dean of Faculty, and other ADs throughout the university to discuss graduate affairs and faculty-related issues.
- ❑ Host the Educational Policy Committee (EPC), the deliberative body on curriculum changes. Review/approve curriculum changes in the college and other units within the university.
- ❑ Oversee graduate student research award competitions (Fall and Spring), dissertation research fellowships, and graduate student travel awards. Review proposals and chair graduate research sub-committees.
- ❑ Co-organize the annual *Matthias* Student Conference. Review *Matthias* Summer Scholarships.
- ❑ Attend prospective student and admitted student events; deliver addresses to attendees. Work with graduate program directors and GEM team to do outreach and help with ‘conversion’. Field select inquires from applicants.
- ❑ Seek and facilitate University-Industry Collaboration (UIC) initiatives within the College of Arts and Sciences. Twin goals are to expand enrollment (to train employees and attract future applicants) and enhance research collaboration and resources.
- ❑ Review low enrolled courses prior to each semester (including summer sessions).
- ❑ Handle graduate student petitions (e.g., leaves, extensions, exceptions, grade change requests), grievances and troubleshooting. Address hardship cases due to financial and adverse circumstances.
- ❑ Organize elections or appoint faculty to serve on College committees (such as the Dean’s Advisory Committee) and/or to serve as College representatives on Faculty Senate committees (such as the Committee on Faculty Actions). Updated the by-laws of CAS committees.
- ❑ Seek and manage College nominations for both university and college awards for faculty and staff.
- ❑ Help conduct training for Department Chairs and graduate program directors.
- ❑ Meet with the Graduate Student Council leaders to listen to and discuss student issues (e.g., financial challenges, health and wellness).

- ❑ Shepherd new graduate degree or graduate certificate programs. Review proposals and work with the Provost Office to request a marketing study, if needed. Recently, provided leadership for a new online MS degree in Data Science, launched in Fall 2023 (i.e., helped recruit a program director, designed curriculum tracks, led meetings among stakeholders, and facilitated budgeting for marketing and course development), and led the development of a new interdisciplinary doctoral degree program in Biomedical and Environmental Health Sciences, to be launched in Fall 2024.
- ❑ Lead other new programs in the pipeline: MA in Public Health Equity, MS in Audio Technology, MS in Security and Intelligence, and MS in Policy, Law, and Neuroscience.
- ❑ Manage content on the Dean's office webpage on scholarships and donor funding for graduate students (to make more transparent, accessible, and recent), as well as the college webpage on committees for faculty service opportunities.
- ❑ Work with Dean's core leadership team to review faculty line requests and faculty merit submissions.

#### CHAIR, ECONOMICS DEPARTMENT, AUGUST 2020 - JULY 2021

---

- ❑ Led a department of 31 full-time faculty, 12 adjunct faculty, and 9 scholars-in-residence. Led the department amid budget cuts, furloughs, and staff shortages (family and medical leaves) due to Covid-19.
- ❑ Facilitated transition of teaching to a virtual modality. Assisted with training of online tools and distribution of equipment (cameras, speakers), supplies, and mail/packages.
- ❑ Mitigated anxiety about the pandemic by having regular group and one-on-one check-ins with faculty and select students. Organized a few virtual happy hours with graduate students and faculty during Winter season.
- ❑ Handled two tenure and promotion cases, multiple term faculty contract renewals, and one faculty retirement. Processed sabbatical and junior leave requests. Mentored adjunct faculty (attending a few of their zoom classes and supporting their professional developments, via references).
- ❑ Established procedures and logistics for merit review during lockdown. Created a share-point site for uploading of materials and for evaluation by committees.
- ❑ Introduced a rotating budget committee to advise Chair. Made the decision process for using the discretionary (restricted) budget more transparent and equitable. Used funds to support faculty research and student projects.
- ❑ Charged with committee assignments. New committee formed was an *outreach committee* for rotating faculty to assist in student recruitment and virtual events (such as webinars) for prospective students.
- ❑ Charged with faculty course assignments and course scheduling. A novel process introduced was a five-year ahead benchmark schedule, with select non-core courses being offered every third semester due to secular trends in low enrollments. The process generated greater certainty for students about course offerings and reduced course cancellations and faculty reassignments.
- ❑ Oversaw program assessments of the BA, MA, and PhD programs in economics (i.e., taking stock of learning outcomes).
- ❑ Hosted annual awards ceremony (virtually). Selected students that matched donor award criteria.
- ❑ Responded to survey questionnaires from various professional organizations about the department (e.g., demographics).

- ❑ Prepared the annual department newsletter and distributed to Alumni.
- ❑ Strengthened the department's special *Program on Gender Analysis* through recruitment of scholars-in-residence from South America, Europe, and West Africa.

#### PHD PROGRAM DIRECTOR, ECONOMICS, JUNE 2017 - JUNE 2020

---

- ❑ Directed the doctoral degree program for the department, the largest on campus. At the time, 110 students were enrolled. Average time to completion is about 5-6 years. Just under half are funded by doctoral fellowships; the rest are self-funded (i.e., have external fellowships, jobs, or family resources).
- ❑ Provided mentorship and primary advising to students. Provided vision and defined the value proposition for the doctoral program. Identified our niche vis-à-vis competing programs: less theory and more applied, policy-oriented work; practical training opportunities, such as internship and externship opportunities in Washington D.C.; faculty connections to local government agencies, development agencies, think tanks, international organizations, among others; faculty specialties in gender economics, agent-based modeling, and development economics (including randomized control trial (RCT) experiences); research paper projects in lieu of a field comprehensive examination; and attentive faculty who highly value their teaching and scholarship.
- ❑ Introduced incremental reforms to expedite completion (e.g., replaced the field comprehensive examination with a research paper requirement and rescheduled core course offerings).
- ❑ Created a formal Blackboard (internet) resource site for doctoral students. The site was arranged by topic: program requirements, funding opportunities, job opportunities, conferences, research opportunities, procedures for advancing to candidacy.
- ❑ Chaired recruitment, outreach, admissions, and fellowship decisions. Attended Open Houses for applicants and organized orientation for new students. Reviewed academic integrity code with students annually.
- ❑ Enlisted faculty and upper-level graduate students to serve as ambassadors to phone and/or email admitted students to improve the yield rate.
- ❑ Organized a math boot camp for new doctoral students.
- ❑ Oversaw the processes for the dissertation proposal defense, committee approvals, advancement to candidacy, progress reports, and dissertation defense. Checked formalities. Ran the doctoral dissertation seminars.
- ❑ Coordinated with the placement director to help graduating students attend the annual *American Economics Association* meeting, which hosts the main job market for economists.
- ❑ Organized luncheon meetings between all faculty and graduate students in their 2nd year and above to discuss research interests and improve matching for forming dissertation committees.
- ❑ Met regularly with the other graduate program directors in the university to discuss policy.
- ❑ Undertook and wrote reports for annual program assessments.
